- Saffron
- Rosewater
- Garlic
- Cinnamon

Indian food is known for its curry smell. How is this done?  
- Meti  
- Hinge  
- Tarka Process

“  
**Smell accounts for 80% of the taste that humans experience.**

## SMELL

## WHY?

While the mouth only has 5 basic tastes, the nose can detect 450 different smells (Richardson, 2015).

## SIGHT

### WHY?

Sight is used to identify the shape, texture, and type of food that you are eating, affecting your expectations.

“  
**Meals arranged in an attractive manner were significantly liked more.**

### HOW?

Just remember CAT.

- Colour
- Arrangement
- Texture

Indian food is known for its curry smell. How is this done?  
- Meti  
- Hinge  
- Tarka Process
